SUMMARY

Results-driven M.Sc. Software Systems student with hands-on experience in **software development, data analytics, and AI-powered applications.** Proficient in **Python, SQL, React.js, and Power BI,** with experience building predictive analytics solutions, responsive web applications, and computer vision projects. Recognized for strong analytical thinking, problem-solving, and collaboration through **industry internship experience, research publications, and real-world projects.**

EDUCATION

M.Sc. Software Systems (Integrated) - Sri Krishna Arts and Science College (2022 – 2027)
CGPA: 8.5/10 (8th Semester)

EXPERIENCE

Web Developer Intern – Ace Creativess **May 2025 – October 2025**

- Delivered **8+ production-ready web applications** using React.js, collaborating with cross-functional teams to interpret requirements and improve UI responsiveness and usability consistency.
- Integrated third-party APIs and supported **end-to-end project execution, contributing to client-focused solutions**, **operational workflows, and product delivery.**
- Collaborated with **designers and stakeholders** to translate business requirements into responsive user interfaces**.**

PROJECTS

Employee Attrition Analytics & Predictive Modeling - Python | SQL | Power BI

- Analyzed HR datasets using Python and SQL to identify employee attrition trends through Exploratory Data Analysis (EDA).
- Developed predictive models using Logistic Regression and Random Forest to predict employee attrition.
- Built interactive Power BI dashboards to visualize workforce metrics and generate actionable business insights.

AI Virtual Mouse Using Hand Gestures & Voice Recognition - Python | OpenCV | MediaPipe

- Developed an AI-powered virtual mouse using computer vision for real-time hand gesture recognition.
- Integrated speech recognition to enable voice commands and enhanced user accessibility.
- Optimized gesture detection to improve system responsiveness and ensure smoother real-time performance.

Handyman Construction Website - React.js | HTML | CSS | JavaScript

- Converted 10+ static HTML/CSS webpages into reusable React.js components.
- Implemented responsive layouts to enhance user experience across multiple devices.
- Improved code maintainability through component-based frontend development.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, Java, C++, JavaScript
- **Core Computer Science:** Data Structures, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems
- **Web Technologies:** React.js, HTML, CSS, REST APIs
- **Data & Analytics:** Power BI, Excel, Pandas, NumPy, Matplotlib, Seaborn, Exploratory Data Analysis (EDA), Data Modeling
- **Tools & Platforms:** GitHub, VS Code, Android Studio, Power BI Service

CERTIFICATIONS

• **Google Data Analytics Professional Certificate** – Coursera
• **Tata Data Visualization: Empowering Business with Effective Insights** – Forage
• **Cloud Application Development Foundations** – Coursera

PUBLICATIONS & PRESENTATIONS

• Published a research paper **"PETGAN: Enhancing Low-Dose PET Imaging Using GAN-Based Denoising for Improved Oncology Diagnostics"** in the International Journal of Engineering Research in Computer Science and Engineering (IJERCSE).

• Presented research papers on digital image processing "**Quality Control in Food and Beverage Industry Using Canny Edge Detection Algorithm"** for industrial quality control and "**Iris Recognition – An Emerging Biometric Technology for Attendance Systems**", biometric-based attendance automation systems.

ACHIEVEMENTS

- **ICT Academy Youth Talk 2024** - Selected among the Top 100 participants and qualified for the Regional Prelims
- Record Holder – 28 Hours Non-Stop Bharatanatyam Performance **(India Book of Records)**
- Performer at **Thillai Natiyangali** (2018 & 2019), a prestigious government-organised classical dance festival.
